

Serverless Demo

Installing NodeJs and NPM using NVM

```
sudo curl -o- https://raw.githubusercontent.com/nvm-sh/nvm/v0.34.0/install.sh | bash
```

```
. ~/.nvm/nvm.sh
```

```
nvm install node
```

```
node -e "console.log('Running Node.js ' + process.version)"
```

```
node --version
```

```
npm --version
```

Installing SLS

```
npm install -g serverless
```

```
sls --version
```

Installing GIT

```
sudo yum install -y git
```

Cloning Repo

```
git clone https://github.com/serverless/examples example-code
```

Installing modules

```
cd aws-python-simple-http-endpoint
```

Configure sls

```
sls --help
```

Deploy

sls deploy

Remove everything - sls remove
